

Approved For Release 2000/09/11 : CIA-RDP67-00059A000400260005-4

26 May 1950

Walter:

Here is an OPC project that will require your personal attention. 25X1A

████████████████████ will be in some day week of 29 May to talk to you

about it. The problem is essentially one of how to handle the production of the desired material, if indeed that is possible. It is closely related to a project which is supposed to be cooking for

25X1C ██████████ (see attached memo), but upon which nothing has so far been delivered. It is very possible that the two projects can be blended.

Bob
